- Training is required
- On demand
- At UF or at your site
- 3 days
- Includes live mock interview
- Covers conversion of data into final database

DIS+SAM
brand new for DSM-5

comprehensive. concise. contemporary.

epidemiology.phhp.ufl.edu/assessments

UF | Department of Epidemiology
UNIVERSITY *of* FLORIDA

DIS+SAM DESCRIPTION

- New, streamlined Diagnostic Interview Schedule-5 and Substance Abuse Module-5
- Fully structured, computerized questionnaire
- Mimics a clinical interview to determine whether psychiatric symptoms are clinically significant
- Ascertains the presence or absence of major psychiatric disorders
- Builds on the DIS used in the landmark Epidemiological Catchment Area (ECA) Study

DSM-5 DIAGNOSES COVERED

- Specific Phobia / Social Phobia / Agoraphobia / Panic Disorder
- Generalized Anxiety Disorder
- Posttraumatic Stress Disorder
- Depression / Dysthymic Disorder
- Manic / Hypomanic Episode
- Schizophrenia / Schizophreniform / Schizoaffective Disorder
- Obsessive-Compulsive Disorder
- Anorexia Nervosa / Bulimia Nervosa
- Attention-Deficit/Hyperactivity Disorder
- Oppositional Defiant Disorder
- Conduct Disorder
- Antisocial Personality Disorder
- Gambling Disorder
- Substance Use Disorders (Alcohol, Amphetamines, Caffeine, Cannabis, Cocaine, Club Drugs, Hallucinogens, Inhalants, Opioids, PCP, Sedatives, Tobacco)

SYSTEM/PROGRAM REQUIREMENTS

SAS 9.3 or above and Access 2010 or above (Access 2016 is preferred)

CHARACTERISTICS & BENEFITS

- Good reliability and validity
- Assesses onset and recency of each disorder, with a lifetime history of symptoms
- Menu-driven to select diagnoses to include in interview
- Useful to clinicians and non-clinicians
- Computer algorithms score disorders
- Brief training required
- 3 year license with ability to renew
